Email: hendersonvo@ucsb.edu **GitHub:** hendersonvo **LinkedIn:** henderson-vo

EDUCATION

University of California, Santa Barbara (UCSB)

Bachelor of Arts (B.A.); GPA: 3.82/4.00

Expected June 2027

Major: Environmental Studies, Minor: Statistical Science

Relevant coursework: General Chemistry (with lab), Introductory Biology (with lab), Global Change Ecology, Intermediate Python, Data Science Principles (R), Environmental Statistics (R), GIS for Environmental Applications, Calculus I & II, Linear Algebra, Differential Equations

PUBLICATIONS

Working Papers

Hilton, A., Boser, A., Caylor, K., Liang, Y., Braconi-Lazarini, L., **Vo, H.**, Tague, N., and Keller, A. (2026). *Over a century of California water data restored by machine learning*. (In preparation).

RESEARCH EXPERIENCE

University of California, Santa Barbara (UCSB), Santa Barbara, California

Arnhold Environmental Fellow — Environmental Markets Lab (emLab) 06/2026 – Present

Spatial planning for human-wildlife conflict and conservation in Southern Africa.

- Synthesized 50 peer-reviewed studies on human-wildlife conflict for model parameterization.
- Compiled multi-source spatial datasets for landscape connectivity analysis.
- Developed Step Selection Function models in R to quantify landscape connectivity and predict wildlife movement corridors across Southern Africa.

UCSB Bren School of Environmental Science & Management, Santa Barbara, California

Bren Environmental Leader (BEL) Fellow — Tague Team Lab 06/2026 – Present

Modeling different forest governance systems in India.

- Conducted literature reviews targeting academic journals and government reports.
- Collected model-relevant data on forests, climate and key tree species for selected regions.
- Analyzed watershed characteristics (population, forest cover, precipitation) in ArcGIS Pro to select representative study regions for comparative forest governance modeling.

Undergraduate Research Assistant — WAVES Lab 09/2024 – 08/2025

Extracting metadata from historical tabular water records from the U.S. Geological Survey using machine learning approaches. *Manuscript in preparation.*

- Built a validation dataset of 100 historical USGS water records to benchmark Phi-4 LLM extraction accuracy against manual expert extraction.
- Designed an evaluation framework that identified 87% agreement between LLM and manual extraction.

BIOMA, Puntarenas Province, Costa Rica

Field Research Intern

08/2025 – 12/2025

Executed field protocols for wildlife data collection. Authored a report analyzing weather effects on sea turtle nesting behavior, highlighting climate and conservation implications.

- Wrote scripts in RStudio using logistic regression models to predict nesting trends.
- Deployed and monitored ocean nets; recorded measurements of sea turtles before release.
- Collected mangrove propagules and monitored sapling growth at field sites.

GRANTS, AWARDS, & FELLOWSHIPS

Bren-Environmental Studies Fellowship (09/2025 – 06/2026). To engage in professional development workshops; targeted at promising rising professionals to increase diversity in environmental fields (\$450 USD) 2025

PROJECT GRANTS

California ReLeaf Arbor Week Grant (02/2025 – 05/2025). \$5,000 USD. 2025

Santa Barbara Foundation Public Trails Grant (01/2025 – 12/2025). \$12,500 USD. 2025

UCSB Associated Students Finance & Business (01/2025 – 09/2025). \$5,400 USD. 2025

UCSB Associated Students Coastal Fund (01/2025 – 03/2025). \$2,400 USD. 2025

Society of American Foresters Regular Grant (01/2025 – 03/2025). \$1,950 USD. 2025

PROFESSIONAL EXPERIENCE

UCSB Residential & Community Living, Santa Barbara, California

Resident Assistant

09/2024 – 06/2026

- Oversee a living complex of 80+ residents and implement curriculum-based community development.

Your Children's Trees (YCT) at UCSB, Santa Barbara, California

Treasurer, Grant Coordinator

06/2024 – 06/2025

- Co-authored grant proposals and secured over \$25,000 in funding for nonprofit operations.
- Researched environmental impacts of nonprofit restoration projects in alignment with funding agency values.

Restoration and Education Intern

01/2024 – 06/2024

- Recorded field measurements of urban trees using height, DBH, and crown spread metrics.
- Maintained campus oak tree nursery by pruning, fertilizing, and setting irrigation lines.
- Educated K-6 audiences on forest-applied science concepts, serving 40+ youth per night.

SKILLS

Computing: R, Python, ArcGIS Pro, Git/GitHub, MS Office, Google Workspace

Field: Tree measurement, mangrove propagule identification, noninvasive wildlife trapping

Laboratory: Operation of pH meters, spectrophotometers, and compound microscopes.
